

Chef's Choice[®] *Crystal Crafter*[™]

INSTRUCTIONS

While applying only light force, move the Crystal Crafter[™] 100% diamond coated file back and forth, in area that needs smoothing. As shown in the illustration, use the curved portion of file to smooth "valleys" and other concave areas. Use flat surface of file to smooth "peaks" or convex areas. Smooths sharp edges in just seconds. As with all tools, use safety glasses.

Also great for touching-up edges on cutlery!
