How to use:

- Place **thefoodloop® flame** around food, grasp finger hole grips on cavity sides, with the other hand grab the tail end and cinch tight.
- To lock into position move cable over the 4 teeth and under the hook on the cavity. Hook tail to cable if needed.
- Cook food as needed. **Caution:** loops become HOT during cooking.
- To remove **thefoodloop® flame**, let loops cool to touch, reverse above steps.
- To clean **thefoodloop® flame**, put the included Velcro® strap around loops and place in the dishwasher or hand clean in hot soapy water.

Care Instructions: Wash before first use.

- Do **NOT** use in the microwave
- **Caution:** loops become HOT while cooking. Allow to cool
- Keep away from children
