

## Descriptions of Components

- The basic components of this product comprise base, seed-stripping lever, spring, handle, stopping plate and seed Cup.

1. Base
2. Casing
3. Fixing Pin
4. Stopping Plate Slot
5. Seed-receiving Cup Slot
6. Receiving Plate
7. Fixing Press Lever
8. Seed-stripping Rod
9. Spring
10. Handle
11. Stopping Plate
12. Seed-receiving Cup

# Cherry Core Stripper

※ The Cherry Core Stripper is applicable for smaller-sized seed fruit like cherries, prunes and plums, turnips, potatoes and cucumbers in applications of seed stripping.

## Instructions of Operation

1. To assemble this product, penetrate Seed-stripping Rod (8) into Casing (2) from bottom to top shown as per Fig.1.

### 《Note》

Be sure to align the plane side of Seed-stripping Rod (8) with Fixing Pin (3) of Casing (2), so as to penetrate the entire Seed-stripping Rod (8).

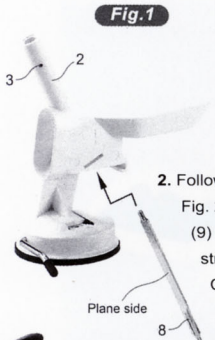

Fig. 1

2. Following that, as per Fig. 2, envelop Spring (9) in-between Seed-stripping Rod (8) and Casing (2) from top to bottom in exposing the thread on the top part of Seed-stripping Rod (8).

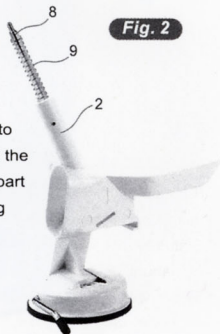

Fig. 2

3. As per Fig. 3, lock Handle (10) tightly on the top part of Seed-stripping Rod (8) to concurrently secure Seed-stripping Rod (8) and Spring (9).

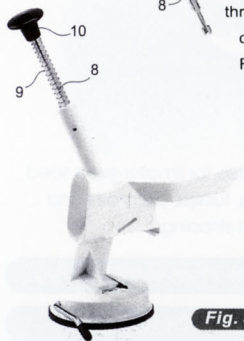

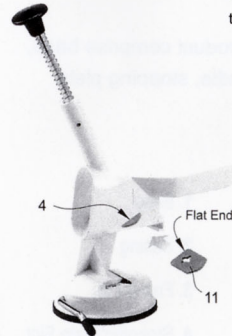

Fig. 3

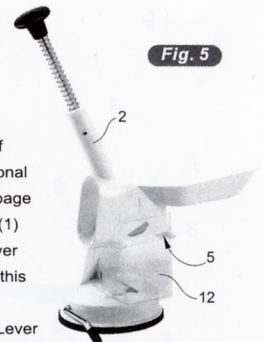

Fig. 4

4. As per Fig.4, insert Stopping Plate (11) into Stopping Plate Slot (4) with its flat end facing toward Stopping Plate Slot (4).

5. Finally, as per Fig. 5, insert Seed-receiving Cup (12) into Seed-receiving Cup Slot, making Seed-receiving Cup (12) located right underneath Casing (2), to complete the assembly of this product.

Fig. 5

6. Regarding the operational method of this product, please see the Operational Status Figure appeared on the first page of Manual. Before use, press Base (1) tightly while turning Fixing Press Lever (7) to the other side to firmly secure this product in place on the table. After placing a plate beside Fixing Press Lever (7) next to Base (1), the cherries for seed stripping can be placed in Receiving Plate (6) and users need only press Seed-stripping Rod repeated to get rid of seeds inside the cherries for sending into Seed-receiving Cup (12). After that, the stripped cherries fall into the plate being placed next to Base (1) one after another.
